

Checkweighing / Serialization & Anti-tampering

A fully integrated automatic solution

With the fully integrated automatic serialization solution, cartons can be easily and safely checkweighed, serialized and dispensed with tamper-evident seals. Eltronic Pharma Engineering and Schur Marking offer a complete solution of hardware, software and pharmaceutical consultation.

The solution can be integrated and implemented into your existing packaging lines. We assist you through implementation and use to guarantee you a fully operational solution, you are comfortable using.

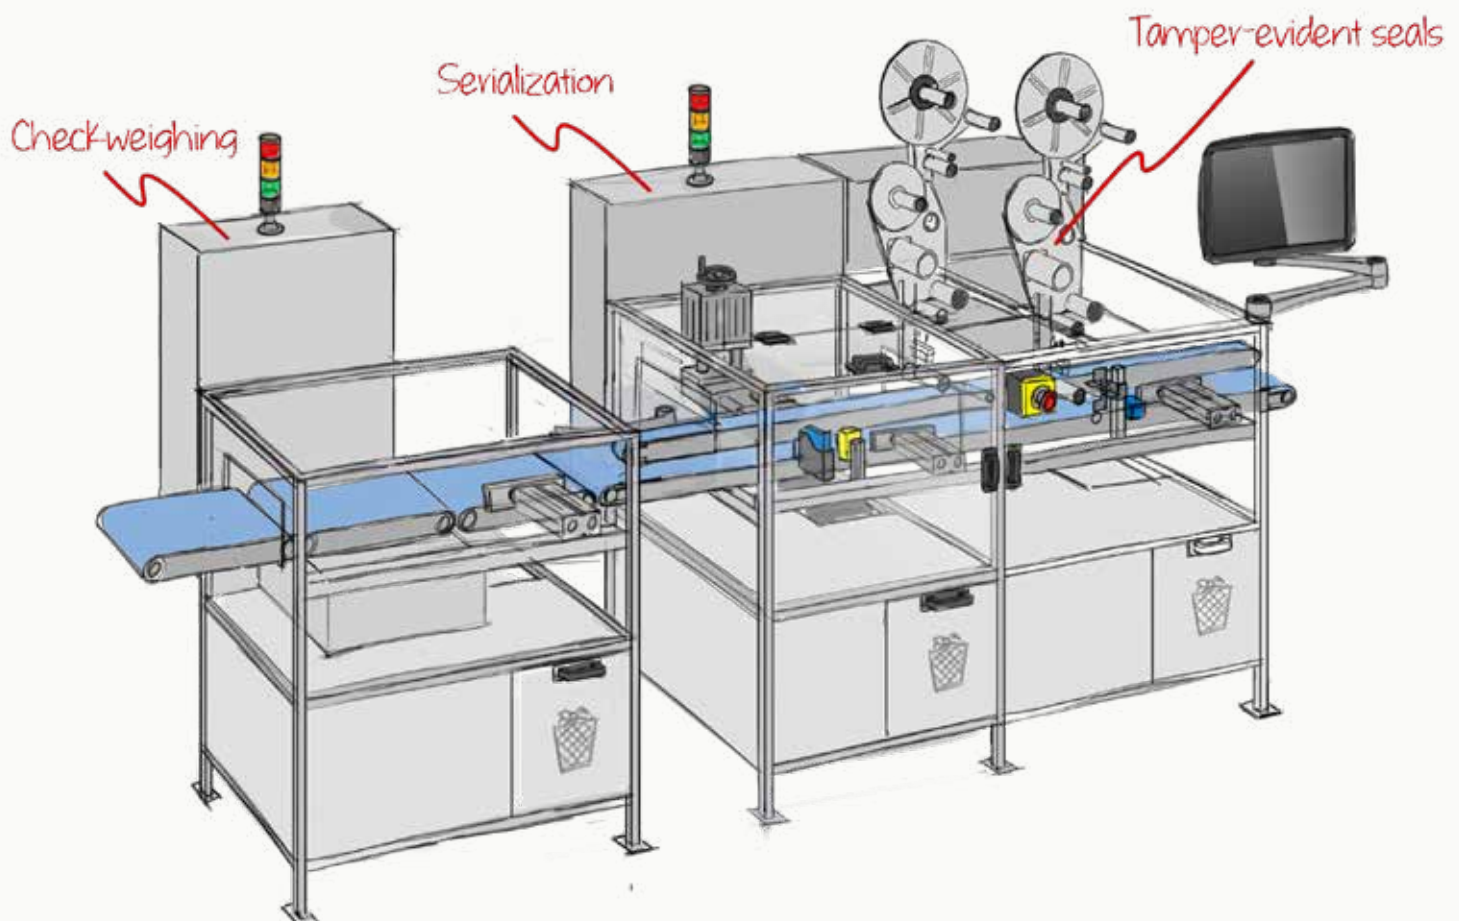

Execution and implementation

- FAT, SAT, IQ, OQ, PQ
- Assistance with PV planning and execution
- Integration, assembly and implementation
- Training of your personnel

Documentation and support

- cGMP compliant documentation package
- Experienced support resources: technical (HW&SW), serialization implementation, cGMP and QA.

Solution elements

Hardware and Software

- Checkweighing with ejection
- HMI and light towers
- 2D matrix and human readable print
- Verification of batch data
- Anti-tampering placement, verification and ejection
- Pharma serialization suite (level 1-5)
- Serialization report formatting
